D – 24V HARD E-STOP, CONTACTOR DRIVE AND MOTOR-BUS SENSE

HARD SAFETY PATH: CTRL24 -> F10 -> ESTOP_LOOP_OUT -> two panel NC contacts -> RETURN -> coil+. Firmware is monitoring only.

LTV-8475 pin mapping verified: A/K=1/2,3/4,5/6,7/8; E/C=9/10,11/12,13/14,15/16. Each used input has 2x2k2 + reverse diode.

LTV-8475 footprint is deliberately blank: verify the wide 2.54mm-pitch SMD package against the purchased reel before creating a custom footprint.

Q1 default OFF: 100R gate resistor + 47k pulldown. Coil TVS voltage/type is REVIEW: do not fit 1N4007-only clamp.

Hardwired E-stop loop, isolated diagnostics and contactor driver
